# STM32MP157 shopping list

- Discovery Kits from STMicroelectronics: STM32MP157A-DK1, STM32MP157D-DK1, STM32MP157C-DK2 or STM32MP157F-DK2[1]
  - STM32MP157 (Dual Cortex-A7 + Cortex-M4) CPU
  - 512 MB DDR3L RAM
  - Plenty of peripherals: GPIOs, SPI, Serial, USB, Ethernet...
- MicroUSB cable (to access serial console)
- USB-C to USB-A cable (to power the board)
- MicroSD card
- RJ45 cable

[1] Boards documentation: A-DK1, D-DK1, C-DK2, F-DK2

# BeaglePlay shopping list

- BeaglePlay, from BeagleBoard.org
  - Texas Instruments AM625x (4×ARM Cortex-A53 CPU)
  - 2 GB RAM
  - 16 GB of on-board eMMC storage
  - Peripherals: SPI, I2C, UART, USB...
- USB-C cable for the power supply
- A USB-FTDI cable
- RJ45 cable for networking
- A micro SD card with at least 2G of capacity

# Training quiz and certificate

- To get your training certificate you must
  1. Attend all sessions of this training course
  2. Achieve more than 50% of correct answers at our final quiz
     - The final quiz questions are identical to the pre-training quiz
     - The final quiz must be completed within two weeks of the session end's date
- The training certificate will be sent to you two weeks after the session end's date.

# Participate!

During the lectures...

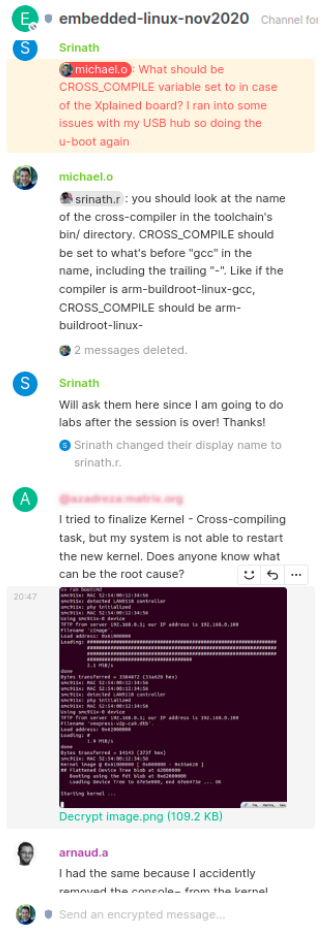

- Don't hesitate to ask questions. Other people in the audience may have similar questions too.
- Don't hesitate to share your experience too, for example to compare Linux with other operating systems you know.
- Your point of view is most valuable, because it can be similar to your colleagues' and different from the trainer's.
- In on-line sessions
  - Please always keep your camera on!
  - Also make sure your name is properly filled.
  - You can also use the "Raise your hand" button when you wish to ask a question but don't want to interrupt.
- All this helps the trainer to engage with participants, see when something needs clarifying and make the session more interactive, enjoyable and useful for everyone.

# Collaborate!

As in the Free Software and Open Source community, collaboration between participants is valuable in this training session:

- Use the dedicated Matrix channel for this session to add questions.
- If your session offers practical labs, you can also report issues, share screenshots and command output there.
- Don't hesitate to share your own answers and to help others especially when the trainer is unavailable.
- The Matrix channel is also a good place to ask questions outside of training hours, and after the course is over.

# Practical lab - Training Setup

Prepare your lab environment

- Download and extract the lab archive
