Kernel Development News

Linux Weekly News

- https://lwn.net/
- The weekly digest off all Linux and free software information sources
- In depth technical discussions about the kernel
- Coverage of the features accepted in each merge window
- Subscribe to finance the editors ($7 / month)
- Articles available for non subscribers after 1 week.

Useful Online Resources

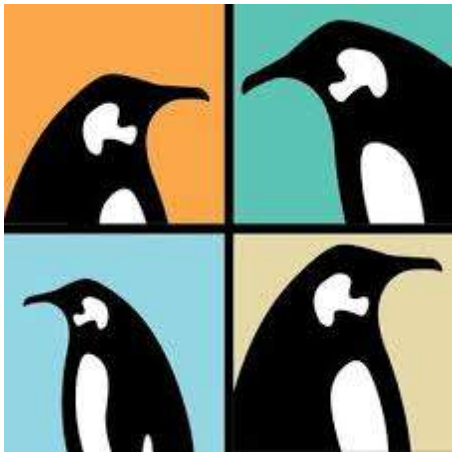

- Kernel documentation
  - https://kernel.org/doc/
- Linux kernel mailing list FAQ
  - https://subspace.kernel.org/etiquette.html
  - Complete Linux kernel FAQ
  - Read this before asking a question to the mailing list
- Linux kernel mailing lists
  - https://lore.kernel.org/
  - Easy browsing and referencing of all e-mail threads
  - Easy access to an mbox in order to answer to e-mails you were not Cc'ed to
- Kernel Newbies
  - https://kernelnewbies.org/
  - Articles, presentations, HOWTOs, recommended reading, useful tools for people getting familiar with Linux kernel or driver development.
  - Glossary: https://kernelnewbies.org/KernelGlossary
  - In depth coverage of the new features in each kernel release: https://kernelnewbies.org/LinuxChanges
- The https://elinux.org wiki

International Conferences (1)

- Embedded Linux Conference:
  - https://embeddedlinuxconference.com/
  - Organized by the Linux Foundation every year in North America and in Europe
  - Very interesting kernel and user space topics for embedded systems developers. Many kernel and embedded project maintainers are present.
  - Presentation slides and videos freely available on https://elinux.org/ELC_Presentations
- Linux Plumbers
  - https://lpc.events/
  - About the low-level plumbing of Linux: kernel, audio, power management, device management, multimedia, etc.
  - Not really a conventional conference with formal presentations, but rather a place where contributors on each topic meet, share their progress and make plans for work ahead.

Embedded Linux Conference

International Conferences (2)

- Kernel Recipes: https://kernel-recipes.org/
  - Well attended conference in Europe (Paris), only one track at a time, with a format that really allows for discussions.
- Embedded Recipes: https://embedded-recipes.org/
  - Same as Kernel Recipes, but focused on embedded topics (Nice).
- linux.conf.au: https://linux.org.au/linux-conf-au/
  - In Australia / New Zealand
  - Features a few presentations by key kernel hackers.
- Currently, most conferences are available on-line. They are much more affordable and often free.

LINUXCONFAU

After the course

Continue to learn:

- Run your labs again on your own hardware. The Nunchuk lab should be rather straightforward, but the serial lab will be quite different if you use a different processor.
- Learn by reading the kernel code by yourself, ask questions and propose improvements.
- Implement and share drivers for your own hardware, of course!

Hobbyists can make their first contributions by:

- Helping with tasks keeping the kernel code clean and up-to-date: https://kernelnewbies.org/KernelJanitors/Todo
- Proposing fixes for issues reported by the *Coccinelle* tool: `make coccicheck`
- Participating to improving drivers in drivers/staging/
- Investigating and do the triage of issues reported by Coverity Scan: https://scan.coverity.com/projects/linux

Contribute your changes

Recommended resources

- See process/submitting-patches for guidelines and https://kernelnewbies.org/UpstreamMerge for very helpful advice to have your changes merged upstream (by Rik van Riel).
- Watch the *Write and Submit your first Linux kernel Patch* talk by Greg. K.H: https://www.youtube.com/watch?v=LLBrBBImJt4
- How to Participate in the Linux Community (by Jonathan Corbet). A guide to the kernel development process
